**Part III DETAILED ACTION**

Claims 1-15 are currently pending.

**Restriction Requirement**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to method for determining global folds, classified in class 702, subclass 19.
- II. Claim 15, drawn to structural map, classified in class 702, subclass 27.

Where inventions are related as disclosed but are distinct as claimed, restriction may be proper. (MPEP 806). The inventions are distinct, each from the other because of the following reasons:

Claim 15 is in product-by-process format, and as such, it is the novelty and patentability of the instantly claimed product that need to be established and not that of the recited process steps. The structural map of folded protein can be obtained by computational methods other than claimed in Group I.

Art Unit: 1631

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
